

LIDLIGHT™

The Solar-Powered Light For Your Storage Box

Sealed internal tilt switch automatically turns the light on whenever the lid is opened at least 15 degrees

Internal 900 mA NiMH battery provides up to 4 hours of continuous light

Five bright white LEDs angled to illuminate your box from end to end

Tough polycarbonate retaining ring with rubber gasket seals tight against any lid up to 3/8" thick

LEDs angled down so light won't shine in your eyes when lid is opened

LEDs sealed in clear polycarbonate lens

High-output solar panel sealed in epoxy and clear polycarbonate for maximum protection against moisture and yellowing
