### INTO THE NIGHT RAILLIGHT | \$29.95

Daylight-saving time was extended by a few weeks this year, but as a boater you still crave more! Continue your outdoor activities far beyond twilight's reaches by furnishing your boat or dock with some RailLights.

Solar-powered lamps that install in seconds, RailLights will provide a relaxing glow for up to eight hours. Each light features two types of clamps: a circular rail clamp for attaching to round rails, and a larger transom clamp that attaches in either a horizontal or vertical position allowing you to secure the RailLight to any edge up to 2 inches thick.

The lamps are sturdy, lightweight and waterproof, and feature an on/off switch for when you're finally ready to succumb to the indoors.
