BRIGHT IDEA

SOL-LIGHT LIGHTSHIP LED SOLAR LIGHT SYSTEM | \$14.95

GIVE YOUR BOAT'S BATTERY a break. The Sol-Light Lightship LED solar light system keeps your vessel bright at night by harnessing the power of the sun during the day.

The Lightship features three suction cups that stick securely to any smooth glass or plastic hatch surface. Just a couple

of hours of sunlight will charge the Lightship's Ni-Cad battery pack with enough power to stay bright for up to eight hours.

The Lightship can be switched between a red and a white super-efficient LED and is available in your choice of six colors: purple, yellow, pink, green, blue or red.
